DATA 101 Assignment 8: Tidyuesday application

Work in teams of 2

Instructions. Create a new Jupyter Notebook. Use Markdown cells for all text explanations/headings and Code cells for Python code. Your file should be named `tidytuesday.ipynb`. Once finished, export the notebook to HTML via **File → Save and export notebook as → HTML (.html)** and bring a printed copy to class.

1. Find a tidyuesday dataset you are interested in from <https://github.com/rfordatascience/tidytuesday>. Explain what made you interested in this data set. Compute basic summary statistics for a few key variables. Create two visualizations that reveal meaningful patterns in the data. Interpret your results in clear, concise sentences. Include both your python code and your written interpretation in your jupyter notebook file.
